

### ***:(Abstract) الملخص***

The topology is a word translated from the English word topology, and the word the topological is divided into two sections of the first section (topo), which belong to the Greek origin to (topos), which means "place" and the second section is (logy). which belong to the origin of the Greek (logos) , which means "study". If we connect the stake holders in the word. we find that the topology is the modern engineering in the study of all the compositions and components of different spaces...

(One of the most famous statements of humor in the topology is):

*:" A topology is a person who cannot tell a coffee cup from a dough nut "*
